Project Overview

The contract will continue to ensure that licensed professionals:

- Apply the correct labeling to containers
- Inspect containers, repackage if necessary
- Safe transport of waste
- Store and dispose of waste
- Provide manifests documentation that meets or exceeds requirements to protect GCRTA

Project Overview

Examples of waste streams:

- Waste solvents from painting operations
- Sludge from bus washing operations
- Solids and semi-solids from oil water separators
- Mercury containing fluorescent light bulbs
- Nickel cadmium, lead acid, and lithium batteries

Project Overview

The contractor also performs analytical testing to determine disposal methods. Examples include:

- Lead Content
- Corrosiveness
- Flammability
- Toxicity
- Reactivity

Project Overview

The contractor will also provide professional emergency response and clean-up services for releases/spills of both hazardous and non-hazardous materials that may occur.

Procurement Overview
